Dear Members of the Search Committee,

I am writing to apply for the faculty position of Assistant Professor of Linguistics with a specialization in Computational Linguistics. I am Assistant Professor of Linguistics at San Jose State University, currently on leave as an invited Visiting Professor at MIT Linguistics. My research interests and teaching experience make me an ideal candidate for your open position bringing new methods and innovation to language science.

My research revolves around mathematical linguistics, and learnability, all under the rubric of the cognitive science of language. I am a heavily interdisciplinary researcher, publishing in linguistics, cognitive science, theoretical computer science, and natural language processing. I have attached samples of my writing in these domains, and you may view a full list of my work and involvement in these communities in my CV, and on my website. I would be thrilled to expand this research program in the department, which has a strong history of mathematical and computational approaches, as well as cross-fertilization between computer science and linguistics generally. Additionally, my work complements and expands the work in linguistics currently on offer at the department, particularly in the areas of learnability and artificial intelligence.

Beyond my commitment to and work as a researcher, I have extensive teaching and mentoring experience, at the graduate and undergraduate level, as well as at specific summer school seminars. As you will see in my teaching statement, my research and teaching are two sides of the same coin, meaning that I am well-placed to meet the unique teaching and mentoring needs of students in modern language science. I have taught courses in linguistics, cognitive science, and computer science, and would love to develop current courses and expand those currently on offer at Georgetown to align with the department's goals and practices. Additionally, I have experience program building at the undergraduate and graduate level, and can be a valuable asset there.

I am confident that my research and teaching experience make me an excellent candidate for this position. I am available to meet at your convenience, and am happy to send any additional materials. Thank you for your consideration, and I look forward to hearing from you.

Sincerely yours,

**Jonathan Rawski**
